**Type** Step Ladder

---

The stepladder Reech is practical, both in function and design, and is created to make everyday life easier and more beautiful.

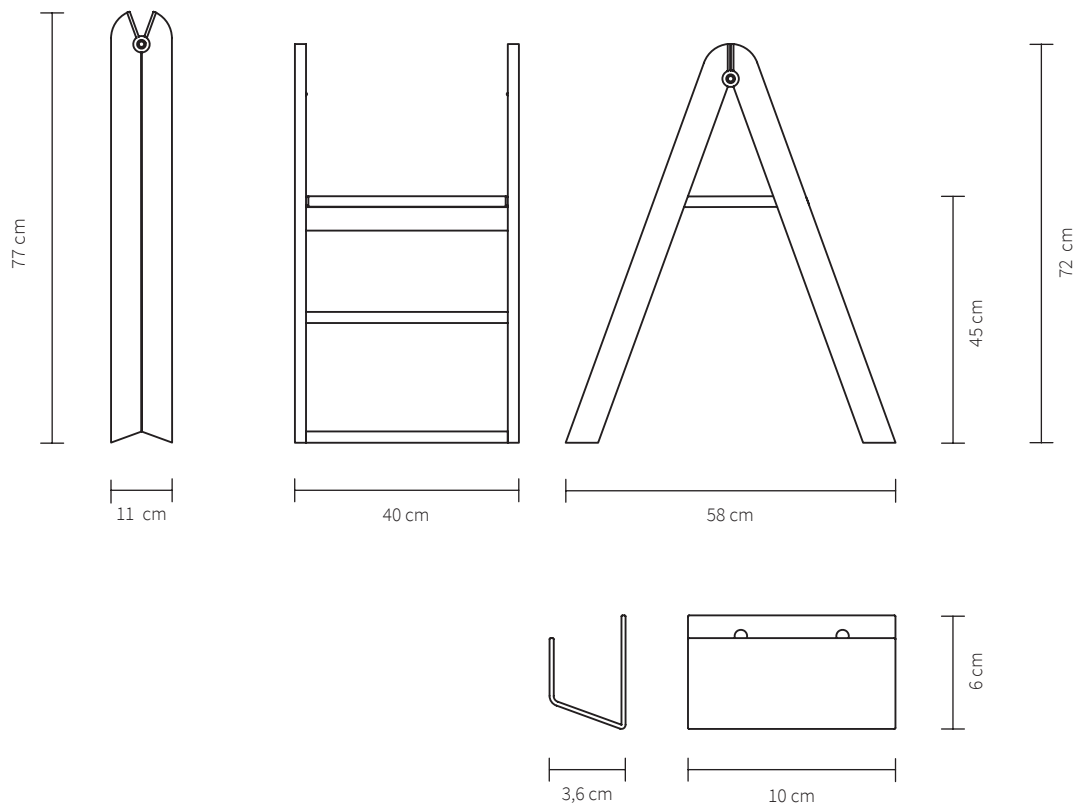

The design of Reech is thought out in every detail, as exemplified by the innovative joints and solutions that are part of the stepladder. A small, almost invisible spring ball keeps the top step in place when the ladder is folded up and not in use. When it is time to use the stepladder it is unfolded most of the way, the top step is folded down, and the ladder is then fully unfolded so that the step locks into place in the frame.

Reech comes with a practical bracket that lets you hang it on the wall or inside a closet. That way it can be tucked away out of sight when it is not in use without taking up any floor space. The wall bracket is hidden behind the top step, which almost gives the illusion that Reech is floating in the air, magically held in place against the wall.
